LOPEZ & OLAN - S11

MARKETPLACE

FEATURES

red - proposed features to be removed for the website specification

View all items

When visiting the web page, everyone, including unregistered users, may see all the 10-15 top rated* item posts by seeing the item name and price. It can then be able to browse through all items posted on the website. Clicking any post title will open the post including the reviews and rating (see: view an item)

*The user may also see the most recent post based on machine time.

View a registered account

Each registered user has their own page shown to the public. Their name/name of store, a display picture, and a short description will be displayed here. All of the items that they are selling will be listed here. Registered users that will visit this page can leave a review and rating for this seller.

Register

To be able to further utilize the website's features, such as adding an item to sell, posting a review, and rating an item, a user must register. The user must enter a unique username, password, short description, and a profile picture*.

*optional

Log In

After a successful registration, users will now be able to start posting items to sell as well as review if they may have bought an item

Log Out

Registered users may log out of their accounts anytime, therefore clearing any session-related data (if it exists)

Post an Item

Registered users may sell their items by creating a post. Posts must include the name of the item, a picture, price, meet up location, contact information, price, mode of payment, quantity available, and a short description. The seller's contact information will only be revealed upon a buyer's interaction to a button which would assume the buyer is interested to negotiate/buy and would further allow a user to rate/review if done so.

View an Item

Users with a link from an item post may be redirected to it and will be shown the title of the post, image, price, quantity, contact details of seller, transaction options, and rate and reviews from past buyers.

Review on an Item/User

After buying, registered users may optionally review either item or user regarding the experience with the product/seller. To verify, a user may only review after 2-3 days of accessing a button revealing the seller's contact information. It is up to the group if reviews may include images for reference.

Edit Profile

Users are allowed to edit their profile page. This includes their profile picture, contact details, description, and other basic information.

Edit Post

Users who posted an item are allowed to further edit their post at any point. They can edit whether they are updating the name, price, description, picture, contact details,

transaction details, description, or the stock number.

Edit Review

Users may edit their reviews of a certain item they bought at any point.

Delete Post

Users can delete any posted items that they own.

Delete Review

Users can delete any review that they created.

Reply to Review

Sellers may reply to all reviews of the items that they posted.

Rate Item/User

Buyers may opt to rate the bought item as well as the user who sold it based on the quality and interaction with the seller. To verify, a user may only rate after 2-3 days of accessing a button revealing the seller's contact information.

Search Item

Any user may be able to search for items by name (similarities in the title and relevance by category).

General

Good user experience. Visitors can easily navigate without help, all information is easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application.
